WNP-UA300P-01

Features

- High power USB WiFi adapter, 802.11b+g+n
- Speeds up to 300 Mbps: watch online movies and stream music with ease
- The high power receiver allows you to connect to networks that are normally out of range
- Keep your network safe with the WPA and WPA2 encryption
- Works with all laptops and PC's

Specifications

- Chipset: RTL8192EU
- Interface: USB 2.0
- Frequency: 2.4 2.4835 GHz
- Supports IEEE 802.11b (up to 11 Mbps), 802.11g (up to 54 Mbps) and 802.11n (up to 300 Mbps) standards dinamically
- RF power: up to 18 dBm
- Supports secutiry: WPS, 64/128 bit WEP, WPA/WPA2, PA-PSK/WPA2-PSK (TKIP/AES)

- Receiver sensitivity: 11M: -85dBm@8% PER; 54M: -68dBm@10% PER; 270M: -68dBm@10% PER
- Antenna t:ype: one detachable SMA antenna and one internal PIFA antenna
- Operating temperature: 0°C 40°C
- Power consumption: 5V DC, up to 0.5 A
- Net weight: 34 g
- Dimensions: 45 x 18 x 10 mm

1. INTRODUCTION

Thank you for purchasing WNP-UA300P-01 High power USB WiFi adapter!

There is a LED indicator blinking when data communication is active.

2. QUICK INSTALLATION GUIDE

This chapter is to assist you how to use the included CD-ROM which comprises the Driver and the Client Utility Interface.

2.1 Driver Installation

Please follow the following instructions to install your new wireless USB Adapter

2.1.1 Insert the USB wireless network card into an empty USB 2.0 port of your computer when computer is switched on. Never use force to insert the card, if you feel it's stuck, flip the card over and try again.

2.1.2 The following message will appear on your computer, click '<u>Cancel</u> / <u>Close</u>'.

Under Windows XP

Hardware Update Wizard	
	Welcome to the Hardware Update Wizard Windows will search for current and updated software by looking on your computer, on the hardware installation CD, or on the Windows Update Web site (with your permission). Read our privacy policy
	Can Windows connect to Windows Update to search for software? Yes, this time only Yes, now and every time I connect a device No, not this time
	Click Next to continue.
	< Back Next > Cancel

Under Windows Vista and Windows 7

Driver Software Installation		×
Installing device driver so	ftware	
802.11 n WLAN	Waiting for user input	
		Close

2.1.3 Insert the driver CD into your CD-ROM. You can see autorun screen below. if not, you can double click '<u>autorun.exe</u>' on CD.

Click 'Install Driver' to start the installation procedure

2.1.4 Installation descriptions shown. Click 'Next' to continue

GEMBIRD EUROPE B.V. http://www.gembird.eu

All brands and logos are registered trademarks of their respective owners

REALTEK USB Wireless LAN	Driver and Utility
N	REALTEK USB Wireless LAN Driver and Utility
	The InstallShield Wizard will install REALTEK USB Wireless LAN Driver and Utility on your computer. To continue, click Next.
	< Back Next > Cancel

2.1.5 Once the installation is finished the computer will be asked to reboot. you can click '<u>Finish</u>' and reboot the computer to finish the installation of driver files.

REALTEK USB Wireless LAN Driver and Utility InstallShield Wizard Complete The InstallShield Wizard has successfully installed REALTEK USB Wireless LAN Driver and Utility. Before you can use the program, you must restart your computer. Yes, I want to restart my computer now. O No, I will restart my computer later. Remove any disks from their drives, and then click Finish to complete setup. < Back Finish Cancel

2.1.6 A new icon will appear near the clock of system tray:

GEMBIRD EUROPE B.V. http://www.gembird.eu All brands and logos are registered trademarks of their respective owners

Left-click the icon will launch wireless network configuration utility, and you can right-click the icon to show the quick menu of configuration utility. This icon also uses different color to show the status of wireless connection:

Wireless connection is established, good signal reception.

Wireless connection is established, weak signal reception.

Wireless network card is not detected.

For detailed instructions of wireless network configuration utility, please see next chapter.

2.2 Connect to Wireless Access Point

To use wireless network, you have to connect to a wireless access point first. You can either use Client utility (comes with network card driver), or Windows Zero Config utility (comes with Windows operating system).

2.2.1 Using Client Utility

Please follow the following instructions to use Client configuration utility to connect to wireless access point.

1. Left-click the Client configuration utility icon located at lower-right corner of computer desktop, and configuration menu will appear:

2. Wireless utility will appear. Click '<u>Available Network</u>' menu to search for wireless access points nearby.

All options in this page will be filled automatically according to the access point you wish to add to profile. However, you can still modify any of them to meet your requirement.

Profile name	You can give a name to this profile, so you can remember its purpose easily. It can be any phrase to help you remember.
Network Name (SSID)	The SSID (Service Set IDentifier, i.e. access point's name). This field will be filled as the access point you selected when SSID is not hidden and grayed out. If SSID is hidden, you have to input correct SSID you yourself.
This is a computer-to-computer (ad hoc) network	Check this box if you wish to connect to another computer / network device by ad hoc method. When not accessing to wireless access point, you have to check this box.
Channel	Select wireless channel for ad hoc connection. This option only appears when you're using ad hoc connection.
Network Authentication	Select the network authentication type from drop-down menu. This setting must be identical with the setting of wireless access point you with to connect.
Data encryption	Select the data encryption type from drop-down menu. This setting must be identical with the setting of wireless access point you with to connect.
ASCII / PASSPHRASE	When the encryption type is 'WEP', it's required to input a set of 'passphrase' to connect to wireless access point. Check 'ASCII' or 'PASSPHRASE' depends on the security setting of access point, and input it in the box; if you select 'PASSPHRASE' you also need to select the length of the key. The passphrase must be identical with the setting of wireless access point you with to connect.
Key index	Select WEP key index. For most of access points you can select '1', but please refer to the setting of the access point.

3. CLIENT UTILITY

3.1 Connection Profile Management

If you need to connect to different wireless access points at different time, like of access point of your home, office, cybercafe, or public wireless service, you can store the connection parameters (encryption, passphrase, security etc, etc.) as a profile for every access point, so you don't have to input these parameters every time when you want to connect to a specific wireless access point.

To manage profiles, right-click the Client configuration utility icon located at lower-right corner of computer desktop, then click '<u>Open</u> <u>Config Utility</u>'.

Click the 'Profile' menu.

Radio Off	Switch wireless radio off. Wireless network functionalities are disabled.
Disable Adapter	Disable wireless network adapter. All functionalities of configration menu will disappear. To resume, unckeck 'Disable Adapter'.
Windows Zero Config	Use Windows Zero Configuration to manage wireless connections. See section 2.2.2.

3.4 Establish secure connection with AP by WPS

Wi-Fi Protected Setup (WPS) is the latest wireless network technology which makes wireless network setup become very simple. If you have WPS-enabled wireless access point, and you want to establish a secure connection to it, you don't have to configure the wireless access point and setup data encryption by yourself. All you have to do is to go to the WPS setup page of this wireless card, click a button, and then press a specific button or enter a set of 8-digit code on

the wireless access point you wish to establish a secure connection - just three simple steps!

For older wireless access points, it's possible to perform a firmware upgrade to become a WPS-enabled access point. Since they may not have a hardware button to press for WPS setup, you can use an alternative WPS setup method - input the pin code. Every WPS-compatible wireless network card support pin code configuration method; you can just input the code to wireless access point, and the wireless access point and wireless network card will do the rest for you.

This wireless network card is compatible with WPS. To use this function, the wireless access point you wish to connect to must support WPS function too. Now, please follow the following instructions to establish secure connection between WPS-enabled wireless access point and your wireless network card.

This wireless network card supports 2 kinds of WPS: PIN code and Push-Button.

Please follow the following instructions to setup WPS:

1. Right-click Client configuration utility icon, and click '<u>Open Config</u> <u>Utility</u>'.

Open Config Utility

3.4.1 PIN Code

To use PIN Code, please click 'Pin Input Config (PIN)' button:

GEMBIRD EUROPE B.V. http://www.gembird.eu All brands and logos are registered trademarks of their respective owners

You'll be prompted to select an access point you wish to connect. If you know its SSID, click '<u>Yes</u>', otherwise click '<u>No</u>'.

Wi-Fi Pr	otected Se	tup (WPS)	
?	Do you war	it to select a spec	ific AP ?
۵	Yes	No	

If you select '<u>Yes</u>', a list of all WPS-compatible AP nearby will be displayed; you can click '<u>Refresh</u>' to rescan, then select an AP and click '<u>Select</u>' button.

/i-Fi Protected Setup -	Select AP 🛛 🔀

Select	Refresh

GEMBIRD EUROPE B.V. http://www.gembird.eu

If you select '<u>No</u>', wireless network card will prompt you to enter 8digit PIN code into your AP, without selecting an AP in advance.

After you select '<u>Yes</u>' or '<u>No</u>' in previous step, network card will attempt to connect to WPS-compatible AP, and an 8-digit number will appear. Please input this number to AP's configuration menu within 2 minutes, and network card will establish secure connection with AP automatically.

To stop this procedure before connection is established, click 'Cancel'.

(*******			
<u>-</u>			

3.4.2 Push Button

To use Push-Button WPS configuration, please click '<u>Push Button</u> <u>Config (PBC)</u>' button. This is the easiest way to establish secure connection by WPS, but if there're more than one WPS-compatible AP using Push-Button config, please use PIN Code instead.

GEMBIRD EUROPE B.V. http://www.gembird.eu

After you click "Push Button Config(PBC)", a message box will appear:

Wi-Fi Protected Setup - PBC method	
Wi-Fi Protected Setup - PBC method	
If there is more than one AP on the PBC mode, there will be [Sessio Overlap].Please use PIN method or wait for a while and use PBC me	n thod again.
Status : AP Sitesurvey	
Complete :	
Push Button Config (PBC) Cancel	

Please activate Push-Button function on wireless access point now, and wireless network card will establish secure connection with access point within one minute.

4. SOFT-AP FUNCTION

Excepting become a wireless client of other wireless access points, this wireless adapter can act as a wireless service provider also! You can switch this wireless adapter's operating mode to 'AP' mode to simulate the function of a real wireless access point by software, and all

other computers and wireless devices can connect to your computer wirelessly, even share the internet connection you have!

Please follow the instructions in following chapters to use the AP function of your wireless card.

4.1 Switch to AP Mode and Station Mode

The operating mode of the wireless card is 'Station Mode' (becoming a client of other wireless access points) by default.

Please follow the following instructions to switch to AP mode:

1. Right-click Client configuration utility icon, and click '<u>Open Config</u> <u>Utility</u>'.

- 2. Select 'Mode', and then select 'Access Point'.
- 3.

GEMBIRD EUROPE B.V. http://www.gembird.eu All brands and logos are registered trademarks of their respective owners

It requires few seconds to switch to AP mode, please be patient.

WARRANTY CONDITIONS	GARANTIE BEDINGUNGEN
The receipt must clearly list the date of purchase and the part number, in addition it should be printed. Keep the receipt for the entire warranty period since it is required for all warranty claims. During the warranty period the defective items will be credited, repaired or replaced at the manufacturer's expense. Work carried out under the warranty neither extends the warranty period nor starts a new warranty period. The manufacturer reserves the right to void any warranty claim for damages or defects due to misuse, abuse or external impact (falling down, impact, ingress of water, dust, contamination or break). Wearing parts (e.g. rechargeable batteries) are excluded from the warranty. Upon receipt of the RMA goods, Gembird Europe B.V. reserves the right to choose between replacement of defective goods or issuing a credit note. The credit note amount will always be calculated on the basis of the current market value of the defective products	Die Garantie beträgt 24 Monate ab Verkaufsdatum an den Endverbraucher. Das Kaufdatum und der Gerätetyp sind durch eine maschinell erstellte Kaufquittung zu belegen. Bitte bewahren Sie Ihren Kaufbeleg daher für die Dauer der Garantie auf, da er Voraussetzung für eine eventuelle Reklamation ist. Innerhalb der Garantiezeit werden alle Mängel, wahlweise durch den Hersteller entweder durch Instandsetzung, Austausch mangelhafter Teile oder im Austausch, behoben. Die Ausführung der Garantieleistung bewirkt weder eine Verlängerung noch einen Neubeginn der Garantieleistung entfällt für Schäden oder Mängel die durch unsachgemäße Handhabung oder durch äußere Einwirkung (Sturz, Schlag, Wasser, Staub, Verschmutzung oder Bruch) herbeigeführt wurden. 	CONDITIONS DE GARANTIE
Op de aankoopbon moeten de aankoopdatum en productomschrijving duidelijk vermeld staan. Gelieve de aankoopbon de gehele garantieperiode te bewaren, deze is ten alle tijden benodigd voor alle garantie aanspraken. Tijdens de garantieperiode zullen alle gebreken verholpen of vervangen worden door de fabrikant d.m.v. reparatie, omruiling van het defecte onderdeel of het gehele apparaat. Aanspraken tijdens de garantieperiode leiden niet tot verlenging hiervan. Garantieaanspraak vervalt bij schade of gebreken die ontstaan zijn door oneigenlijk gebruik, misbruik of invloeden van buitenaf (vallen, stoten, water, stof, vuil of breken). Slijtagegevoelige onderdelen (b.v. batterijen) zijn uitgesloten van garantie. Bij ontvangst van de RMA goederen behoudt Gembird zich het recht om te kiezen tussen vervanging van de defecte waren of het uitgeven van een kreditnota. Het bedrag van de kreditnota zal altijd gecalculeerd zijn op basis van de huidige marktprijs voor het defecte produkt.	Le talon de garantie doit énumérer clairement la date d'achat et le type d'appareil. Conservez le reçu d'achat pendant toute la durée de la garantie car elle est nécessaire pour toute réclamation. Au cours de la période de garantie tous les défauts doivent être remplacé aux frais du fabricant, soit par la réparation ou la remplacement de la pièce défectueuse ou l'ensemble du produit. Les travaux effectués sous garantie ne prolongent pas la période de garantie. Le fabricant se réserve le droit d'annuler toute demande de garantie pour les dommages ou défauts dus à une mauvaise utilisation, abus ou les effets externes (chute, choc, pénétration de l'eau, la poussière, etc). Les pièces d'usure (par exemple les piles rechargeables) sont exclus de la garantie. Dès réception de la marchandise sous garantie, le SAV de Gembird Europe BV se réserve le droit de choisir entre le remplacement des produits défectueux ou de délivrer un avoir.
